

SMRE's range delivers quality, versatility and reliability

WANT THE ADVANTAGES OF A FULLY AUTOMATED PLOTTER CUTTER MACHINE BUT WORRIED BY THE COSTS? LOOK NO FURTHER!

SMRE have designed a new innovative multiple head plotter with many of the features and build quality of the flagship of their range, the SM-370, but at a more competitive price.

The SM-375-TA can be supplied in various sizes with the 3.5m x 5m machine being specifically suited to the Awnings, Shade and Blinds industry. The machine will come with crush cut and rotary blade cutting systems.

SOME OF THE MACHINES YOU'LL SEE ON STAND 35 AT THE BBSA SHOW 7th - 9th OCTOBER Ricoh Arena, Coventry

SM-215-SA

Moving head line welder with hot air, Rotosonic or liquid glue technology.

High build quality, high reliability and competitive pricing are the main attributes of this easy to use machine.

With its Intelligent Torque technology, the SM-215-SA provides the perfect solution for the linear bonding of technical fabrics.

Widely used in the manufacture of blinds, shade sails, awnings and high tech curtains as well as tarpaulins, gazebos and PVC covers.

NEW
OFFICIAL LAUNCH AT BBSA SHOW

SM-200-SA

The SM-200-SA is a strong, simple, and very efficient fabric bonding machine with stationary welding head. The SM-200-SA is equipped with a choice of two different bonding technologies: Rotosonic (ultrasonic) or hot air.

The SM-200-SA is an easy-to-use, highly efficient solution for fabric welding, an indestructible machine that will do its job with precision and simplicity.

The machine is available in two versions: with a stationary welding arm to weld straight seams, and with a free and rotating arm for straight seams, curves and circles.

NEW

Portable Roll Warehouse introduced

Why continually walk backwards and forwards when replacing rolls on your cutting tables?

We have designed a new portable roll warehouse which can save hundreds of hours in lost production time per week. The machine can have up to **18 rolls** and will be able to **supply two cutting tables with different rolls**. Each roll can be loaded and removed easily by the operator. When the present job is completed the roll is replaced into the roll warehouse and the next roll is moved into position. **Don't wait for the competition to beat you act now and become more efficient overnight.**

For more information contact our sales team alternatively if you are visiting the **BBSA show** we will be more than happy to discuss your requirements.

NEW

Budget Range Automatic Plotter

SMRE are launching the **SM-375-TA** cutting plotter which is designed for companies who have a requirement for a fully automated plotter cutting machine which will cut various shapes with multiple cutting tools but have a limited budget. SMRE have designed a multiple head plotter with many of the features and build quality of the flagship of their range the **SM-370-TA** at a more competitive price. On discussions with our customers we expect the interest in this machine to be extremely high.

Find out more by contacting our sales team or visit our stand at the upcoming **BBSA show** we will be happy to discuss your requirements.

SALES FOR 2012 AT AN ALL TIME HIGH

So far this year our sales of machinery to our customers have exceeded expectations with further sales of larger multi-roll machines still pending.

We offer basic manual operated machinery to full multi roll production lines.

Through our supplier portfolio we can supply many industries including banner, shade, tarpaulin, medical, automotive, packaging plus many more.

We are an innovative professional company who really care about our customers requirements.

Our company motto is 'TEAM' - *Together Everybody Achieves More*

VISIT US ON STAND 35 BBSA SHOWCASE 7th - 9th OCTOBER Ricoh Arena, Coventry

We will be exhibiting a selection of SMRE machines along with full operation of the machines on our stand.

If you are interested in receiving more information, or, you would like tickets for the show, please contact our sales department on **01274 306060**.

Formed in 1991, R.H. Plastics Technology are one of the U.K.'s longest established suppliers of machines, consumables and genuine manufacturer spares to the Medical, Automotive, Packaging and Tarpaulin industries. Their comprehensive service is truly international as they import, export and service machines on a worldwide basis.

Their association with hi-tech Italian company S.M.R.E. Engineering sees the introduction to the UK of the latest cutting, hot air welding, Liquid Glue bonding and sewing machinery for the production of awnings, blinds and sun screens.
